This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MGTS

MGTS IDAD Future Wealth Fund A Acc (GB00BN7JHF40)

The Sub-fund is managed by Margetts Fund Management Limited.

Objective and Investment Policy

Investment Objective

The objective of the MGTS IDAD Future Wealth Sub-fund is to provide Capital Growth over any 7 year period.

How will the objective be achieved?

The Sub-fund will be actively managed through investments which focus on sectors that are expected to deliver strong Capital Growth in the future, including those that incorporate innovative technologies, changing demographics and changing economic developments.

A minimum of 70% of the portfolio will be invested in collective investment schemes, in any economic sector and any geographic area, across a wide range of assets. This includes shares, bonds, cash and near cash instruments.

The Sub-fund may also invest (maximum of 30%) in shares, bonds, cash, near cash instruments, investment trusts, and structured products which may embed derivatives.

Normally, the Sub-fund will be fully invested save for a cash amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the Sub-fund both generally and in relation to its strategic objective. This amount will vary depending upon prevailing circumstances and although it would normally not exceed 10% of the total value of the Sub-fund, there may be times when the Investment Manager considers stock markets around the world to be overpriced or that a period of instability exists which presents unusual risks. In such cases or during such periods and, if considered prudent, the amount of cash or near cash instruments held would be increased. Unless market conditions were deemed unusually risky, the increased amount and period would not be expected to exceed 30% and six months respectively.

Management Style

The Sub-fund is actively managed, meaning that the manager selects investments, rather than tracking a stock exchange or index.

Derivative Use

The use of derivatives and/or hedging transactions are permitted in connection with investment purposes and efficient portfolio management (EPM - managing the Sub-fund in a way that is designed to reduce risk or cost and/or generate extra income or growth or both). The scheme may hold assets which embed derivatives that are used for investment purposes and efficient portfolio management.

General

Shares in the Sub-fund can be bought and sold daily (every Business Day of the Sub-fund). If you invest in income shares, income from investments in the Sub-fund will be paid out to you. If you invest in accumulation shares, income will be retained in the value of your shares.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Risk and Reward Profile

The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free.

The Sub-fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Sub-fund rises and falls). The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.

The following risk factors are relevant to the overall risk profile of the Sub-fund. A full description of risk warnings is provided in the prospectus, which is available on our website, or by requesting a copy.

Investments in collective investment schemes may provide a higher level of diversification but may also increase costs. The underlying collective investment schemes may also experience operational or credit issues which could impact liquidity (the ability to sell) or capital value.

There may be a significant exposure to cash or money markets. If investment markets generally rose during this period, against expectation, then returns would be reduced.

A concentrated number of sectors could lead to higher levels of price fluctuations. There may be sector-specific factors, such as competition from new entrants, short product cycles and fluctuating company profits and prices due to the competitive nature of its participants. Concentration on specific industries may lead to higher volatility in comparison to other strategies with higher diversification or the market as a whole.

Exposure to currencies other than the base currency is subject to currency fluctuations which could add to the rise and fall in value of investments.

Share prices fluctuate in value due to factors including political, economic, company earnings and corporate events.

Exposure to global shares may include regions considered to carry more risk. This means that the rise and fall in value could be greater than for lower risk investments, or that they may be harder to sell at expected prices.

The objective, policy and strategy set out above should align with the objectives of the investors and their minimum timeframe for investment.

Charges

The charges you pay are used to pay the costs of running the Sub-fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%

The entry and exit charges shown are the maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

Charges taken from the Sub-fund over a year	
Ongoing Charges	1.00%
Performance Fee	0.00%

The ongoing charges figure is based on the last year's expenses (or reasonable estimate where Sub-fund has not been operating for a full calendar year), for the year to 31 Dec 2025 and this figure may vary, year to year. It excludes portfolio transaction costs.

For further details on the calculation of the charges please refer to the Sub-fund's prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs except entry and exit charges and it is inclusive of net reinvested income.

The Sub-fund was launched on 23 Aug 2021.

The share class was launched on 23 Aug 2021.

The performance is calculated in pounds sterling.
